16:00	16:30	Pressure flow analysis (basic)	<ul style="list-style-type: none">• Peter Rosier
16:30	17:00	Questions	All

Aims of course/workshop

This workshop aims to record the first ICS Urodynamic Committee teaching modules (before a live audience). It is foreseen that the first modules, respectively: 'Cystometry', 'Pad-testing', 'Pressure flow analysis (basics)' and 'video-urodynamics (basics)' will be presented.

Educational Objectives

The educational modules will be the basis for ICS education of urodynamic techniques. We now plan to record the first, of hopefully a large series. Every educational (teaching) module will consist of a 'slides set', a 2 page manuscript -submitted to and published- in Neurourology and Urodynamics and a presentation of the slideset made available on the ICS website. This opens the way to modern, cost saving continuous teaching of ICS 'Good Practice'. Please note that the precise topics of the educational modules might be subject to change, depending on the state of the modules. The aim of the workshop is the recording. On the basis of communication with the ICS office I have decided to submit this ICS teaching modules recordings formally as an 'ICS workshop' to ease planning.
