

Time	Topic	Speakers
10	Introduction	Seyed Shobeiri
20	Anatomical basis of pelvic floor ultrasonography	Jonia Alshiek
25	Transperineal / Introital US imaging of the pelvic floor instrumentation and orientation	Talia Friedman
25	Endovaginal and endoanal imaging of the pelvic floor instrumentations	Seyed Shobeiri

Aims of Workshop

Many surgeons learn best by observing expert surgeons. Given the number of mesh sling and prolapse repair cases performed experts are confronted with complications of such cases. Most patients with such complications who are appropriately treated have resolution of symptoms. The critical point is that those surgeons dealing with such cases have the expertise to successfully manage them. This course will review the role of ultrasound management of such complications with a focus on using video demonstrations to specifically review the techniques necessary for successful surgical planning.

Learning Objectives

To overview the role of ultrasound in mesh complications

Target Audience

Urology, Urogynaecology and Female & Functional Urology, Bowel Dysfunction, Conservative Management

Advanced/Basic

Intermediate

Suggested Learning before Workshop Attendance

Practical Pelvic Floor Ultrasonography, 2nd Ed. Editor: S. Abbas Shobeiri 2018
