

Start	End	Topic	Speakers
17:30	17:35	Introduction to the workshop	Linda Ferrari
17:35	17:50	Pathophysiology of ODS and overlapping with POP, FI, IBS and slow transit constipation	Linda Ferrari
17:50	18:05	Clinical evaluation patients with ODS and use of questionnaires	Liliana Bordeianou
18:05	18:20	Diagnostic tests for ODS	Alison Hainsworth
18:20	18:35	Conservative management for ODS	Paula Iguilada-Martinez
18:35	18:50	Surgical management for ODS	Liliana Bordeianou
18:50	18:55	The importance of multidisciplinary approach	Paula Iguilada-Martinez
18:55	19:00	Discussion and questions	All

### **Aims of Workshop**

The aim of this course is to learn how to evaluate and manage obstructive defaecation syndrome (ODS).

Principal aims and objectives are:

- Understand the pathophysiology of ODS
- Recognise and classify types of ODS, overlapping with pelvic organ prolapse (POP), slow transit constipation and faecal incontinence (FI)
- Clinical evaluation of patients with ODS
- Use of questionnaires to stratify ODS symptoms
- Understand the role of tests in patients with ODS
- Understand the role of conservative management
- Understand the role of surgery
- Understand the role of an integrate multidisciplinary team to assess and treat patients with ODS

### **Learning Objectives**

Importance of assessment for patients with obstructive defecation and importance of standardized questionnaires

### **Target Audience**

Bowel Dysfunction

### **Advanced/Basic**

Intermediate

### **Suggested Learning before Workshop Attendance**
